

What are your thoughts?

Long Lake Township is developing a Forest Stewardship Management Plan for its 120 acre municipal forest. The plan will include recommendations on timber management, wildlife management, aesthetics and resource protection. The property was acquired from the Michigan Department of Natural Resources in 2001. The deed states, *"It is expressly understood that this property shall be used exclusively for outdoor recreational use and old growth forest."*

The Township is considering development of nature trails to be used for hiking, cross country skiing and nature study. Other possibilities may include access road improvements, development of a parking lot, timber management, hunting, and restricting ATV usage.

We would like your thoughts on what Long Lake Township should do with this important natural woodlands. If necessary use the back side.
